

Theater Volume 36

Filesize: 1.57 MB

Reviews

Merely no words to clarify. I could comprehended every little thing using this created e pdf. I am just effortlessly could possibly get a enjoyment of reading through a created publication.
(Mr. Ari Powlowski)

THEATER VOLUME 36

To read **Theater Volume 36** PDF, remember to click the web link beneath and download the ebook or have accessibility to other information which are in conjunction with THEATER VOLUME 36 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Portland, OR : U. S. Dept. of Agriculture, Forest Service, Pacific Northwest Research Station, 2007 OCLC Number: (OCoLC)144810475 Subject: Marbled murrelet -- Monitoring -- Pacific States. Excerpt: . . . Regional Population Monitoring of the Marbled Murrelet: Field and Analytical Methods line (by using a trigonometric calculation to obtain the distance). Although estimates were found to be negatively biased, the direct estimate of perpendicular distance was more precise. Raphael and Laake (2000, available from the senior author on request) documented the full set of steps necessary to configure program DISTANCE for analysis of data to compute a detectability function using this design. Observer Methods We conducted a number of tests to determine whether to use one or two observers to record murrelet observations (<http://www.reo.gov/monitoring/murrelet/pdf/pnwatsea.pdf>, Evans Mack et al. 2002). We obtained more accurate results from two observers than from one observer, especially when bird density was high and in wind conditions that generated wind wavelets. Under these conditions, single observers missed a higher proportion of birds close to the line than two observers. After having evaluated the results from these experiments, we decided to use two observers at all times. During surveys, each of the two observers surveyed 90 arcs on their side of the boat starting from the bow. Observers scanned continually, but more effort was expended watching for birds close to the line ahead of the boat (within 45 of line) to reduce the risk of missing birds located close to the transect line. Observers estimated the perpendicular distance of each murrelet (or the center of a group of murrelets) from the transect line...
