In *The Geek s Chihuahua*, Ian Bogost addresses the modern love affair of living with Apple during the height of the company s market influence and technology dominance. The ubiquitous iPhone and its kin saturate our lives, changing everything from our communication to our posture. Bogost contrasts the values of Apple s massive success in the twenty-first century with those of its rise in the twentieth. And he connects living with Apple with the phenomenon of hyperemployment the constant overwork of today s technological life that all of us now experience. Bogost also reflects on the new potential function as well as anxiety and anguish of devices like the Apple Watch. We are tethered to our devices, and, as Bogost says: that s just life anxious, overworked, and utterly networked life. *Forerunners: Ideas First* is a thought-in-process series of breakthrough digital publications.
