iUniverse, United States, 2008. Paperback. Book Condition: New. 228 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.This book investigates the astonishing claim that blind persons, including those blind from birth, can actually see during near-death or out-of-body episodes. The authors present their findings in scrupulous detail, investigating case histories of blind persons who have actually reported visual experiences under these conditions. There is fascinating evidence that the blind do see in these moments, but it is not sight as we think of it. Ring and Cooper suggest a kind of transcendental awareness they refer to as Mindsight. It involves seeing in detail, sometimes from all angles at once, with everything in focus, and a sense of knowing the subject, not just visually, but with multisensory knowledge. Human beings may be more talented than we think, gifted with amazing abilities of perception. This book is an opportunity to assess the evidence for yourself.
