RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 218 pages. OCLC Number: (OCoLC)162508408 Subject: Biomass energy -- United States. Excerpt: . . . support for developing biomass as a key energy feedstock is coming from a variety of national and international organizations (GEC 2005; Ag Energy Working Group 2004; IEA 2004). Although these reports differ in the amounts of gasoline that could be replaced by ethanol from biomass, they all agree on three key issues: (1) Current trends in energy use are not sustainable and are a security risk; (2) No single solution will secure the energy future - a diverse portfolio of energy options will be required; and (3) Biofuels can be a significant part of the transportation sectors energy solution. In its evaluation of options for domestic production of motor fuels, the National Commission on Energy Policy (NCEP) recommended cellulosic biomass as an important topic for near-term federal research, development, and demonstration and found that cellulosic ethanol has the potential to make a meaningful contribution to the nations transportation fuel supply in the next two to three decades (NCEP 2004). The Natural Resources Defense Council (NRDC) has projected that an aggressive plan to develop cellulosic biofuels in the United States could produce the equivalent of nearly 7. 9 million barrels of oil per day by 2050 . . . more than 50 percent of our current total oil use in the transportation sector and more than three times as much as we import from the Persian Gulf alone (Greene et al. 2004). This corresponds to roughly 100 Bgal year ethanol. NRDC also recommends 1. 1 billion in funding between 2006 and 2012 for biomass research, development, and demonstration...
