Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Physico-Chemical Calculations This collection of physico-chemical problems is based on Abegg and Sackur s Physikalisch-Chemische Rechen-aufgaben (Sammlung Goschen). The original intention was simply to translate the German book, which consists of a short summary of the laws and formulae used in the problems, and fifty-two typical problems, with full solutions. With the consent of the late Professor Abegg and of Dr. Sackur, however, I decided to arrange the subject-matter in chapters dealing with the main subdivisions of physical chemistry, and to write a short introduction to each chapter, dealing with the theory involved in the problems. Most of the problems in the Rechenaufgaben have been retained, a good many additional solved problems have been introduced, and a collection of problems for solution (with answers) has been added at the end of each chapter. The size of the book has thus been more than doubled. Most of the problems have been taken direct, or with slight modification, from the original literature. I shall be grateful to have any errors in the text pointed out to me. I would take this opportunity of expressing my indebtedness to the late Professor Richard Abegg, and to Dr. Otto Sackur, of the University of Breslau, for their kindness in allowing me to make use of their Rechenaufgaben as the basis of this book. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original,...
