Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . environment, there to produce, as the case may be, color, toxin, or even definite changes in form. TOXICITY AND LUXURIANCE OF GROWTH. As to the relation between the degree of toxicity and the luxuriance of growth, the experience of the writer would not warrant the drawing of any far-reaching conclusions. It is true, however, that the solid-staining types, whether they be true B. diphtheriae, pathogenic pseudo-diphtheria bacilli, or non-pathogenic pseudo-diphtheria bacilli grow more rapidly upon proteid-free media than do the granular types. Not only do the D2 forms grow more rapidly, but the nature of their growth is far more luxuriant and of quite a different nature from that of the granular varieties. The typical growth for the granular type, on either broth or proteid-free media, is at the surface, where it forms a more or less delicate film. Upon shaking the tube, this film...
