Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

His intellect and tenacity quickly attracted the attention of the Director of Space Operations at NASA. An exclusive visit, offered by the Director John Newburg, to the lower chambers of the Jet Propulsion Labs in Pasadena provided Steve with information on the true nature of what NASA was tracking. Intended to quiet the reporter, the visit only spurred his interest more. Newburg had his agenda. Secretly, he was leading a team that was attempting to create a new protein synthesis process. Along the way, Newburgs team had stumbled on to a protein cell; an alien protein cell that Newburg convinced the Department of Defense held limitless possibilities. Located within the tail of a highly toxic approaching comet, Newburg had plans to harvest the cells from space. He only needed Gaines for a computer program. Giving him a peek at the real prize was worth it to Newburg. Unfortunately for Newburg, a solar flare of before unimaginable...
